## P R E F A C E.

THE present volume forms the second and concluding portion of the Index to "Reynardson," one of the Six Clerks' series or divisions of Chancery Proceedings.

It is hoped that one or other of the "Six Clerks" may soon be taken in hand, but a good deal depends on the action that the Public Record Office authorities may take, for it may be decided that the period 1649 to 1714 should be treated in the same manner as the "Index to Chancery Proceedings," Series II. (Lists and Indexes, No. VII.), already issued by the Public Record Office.

Such a calendar as this would be a great improvement on an Index of mere surnames of the parties to the suits, for in the Series II. Index both Christian and surname of the parties, together with the county and a brief indication of the nature of the suit are given, thus enabling the searcher to decide whether any particular document is likely to be of use to him or not. A great saving of time also is effected by these more descriptive Indexes, both to the searcher as well as to the officials at the Public Record Office.

The whole system under which the "Six Clerks" did their work was so fully described in the Introduction to the first volume of this Index that nothing further need be said on this subject.

Up to the present no sketch or drawing of the old house in Chancery Lane formerly occupied by the "Six Clerks" over against the Rolls Office, has been found; but the compiler will be glad to hear from any one who may come across such a drawing.

E. A. FRY.
